

# Fehmarnbelt Days 2025

14. 6. – 16. 6. 2025

Citizens' Festival & Conference

# The Message

## Living Democracy and The German-Scandinavian Friendship

We want to celebrate the vibrant Fehmarnbelt region under the motto “participate, discuss, shape”. A region in which citizens can play an active role in shaping the future and advocating for democracy across countries. Whether at stands, squares or on and in front of stages – people will engage in conversation and collectively discuss new ideas for the region and society together. Players from politics, administration, business and academia will meet interested citizens and volunteers in an informal atmosphere.

With the Fehmarnbelt Days 2025 (FBD 2025), we aim to promote neighbourly coexistence in the Fehmarnbelt region and inspire people to a greater interest in shaping society.

Good to know: The thematic guidelines and activities of FBD 2025 are aligned with the UN Sustainable Development Goals 2030. On one hand, we want to show the pioneering role the Fehmarnbelt region already plays in the area of green growth, but also identify the challenges and realise untapped potential.

# The Citizens' Festival

Everyone is Welcome.

The Citizens' Festival takes place in the immediate vicinity of the conference and the Trave riverbank – always in view: Lübeck's Old Town.

Strolling, marveling, informing, discussing – we want our guests to feel at home with us and to be able to engage with our themes of the Fehmarnbelt Days – whether casually or very intensively.

The music programme, discussions and culinary delights are dedicated to the diversity of our partner countries and to international understanding – important to us is a balanced relationship between the conveyance of content, lively discussions and sheer joie de vivre.

# The Conference

## Four Years Ahead of the Future.

2029: Finalisation Fehmarnbelt Fixed Link

The main focus of the conference at the Fehmarnbelt Days 2025 lies on motivating people, businesses and decision makers alike to take initiative. We seek to highlight the possibilities that lie ahead and the success stories that can already be seen within the Fehmarnbelt region and beyond.

While a focus still remains on the core subject of the Fehmarnbelt Days – cultural integration and regional development – we aim to develop new focal points, e.g. mobility and infrastructure, business and labour market, tourism and culture, living, etc.

The FBD partners provide the supporting programme and the rooms. Stakeholders from the region are invited to present their topics, content and projects in small, interactive workshops in the Lübeck Music and Congress Centre and on the festival grounds.

# The Project

## Visualisation of the Fehmarnbelt Fixed Link.

The thematic examination with the opportunities and perspectives of the Fehmarnbelt Fixed Link is the most important component of the overall concept. An Infinity Dome will serve as a spectacular stage for the FBFL and the multifaceted aspects of the project.

With 360° material, the central connecting element of the coming decades will be informatively and immersively presented to the visitors. The Infinity Dome will be open throughout the duration of the FBD for activities, information, and discussion formats of the project partners.

We look forward to seeing you!
